Patented Technology for Secure Email

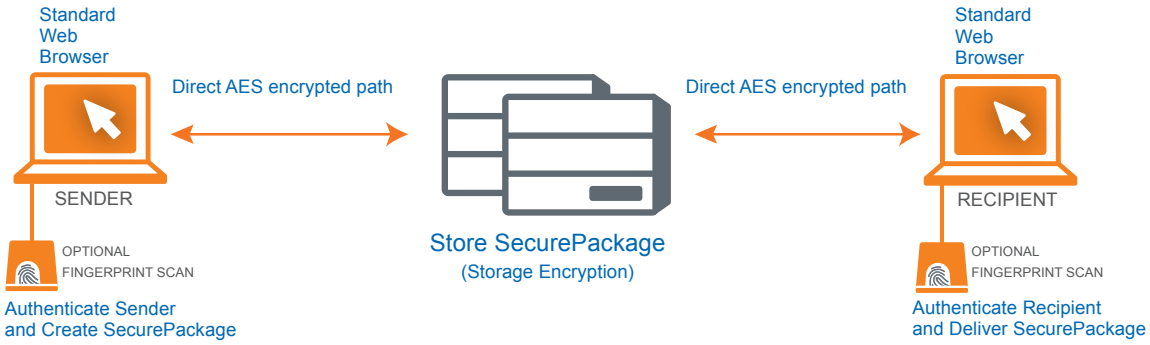
Provide an important "missing piece" for your clients.

ConnectWise® Integrated

SenditCertified is a patented cloud-based system that enables users to securely send and receive encrypted email messages and large files online. SenditCertified offers simplicity without compromising security.

- Easy for MSPs to integrate with MS Outlook and ConnectWise, also offers desktop and mobile applications
- Email recipients don't have to register or download software to use service
- The service provides a 'read response' once recipients have viewed messages
- There are no sending file size limitations
- Patented technology meeting NIST standards, Meaningful Use requirements and HIPAA compliance
- Quickly and easily fits into clients' current environment and workflow because it's not bound to a specific product, software or email client.
- Optional add-on services generate additional revenue for your company.
- Personal and Corporate SecureInboxes,
- E-SIGN compliant SecureSignature
- Increased storage

SenditCertified is the ideal patented solution for sending and receiving confidential information. SenditCertified requires almost no training, is user-friendly, and can be rapidly deployed - even to a large client base. Upsell features for your clients include the SecureInbox (Receive capability), electronic signatures, enhanced cloud-based secure storage, and biometric authentication. SenditCertified is used by healthcare, financial services, legal, and other industries that require secure communications.



Benefits for our reseller partners include:

- Suite of secure email features
- Integration with ConnectWise
- Administration portal for managing clients
- MSP-branded version of SenditCertified
- Marketing content, end-user guides and training materials
- Access to the online SenditCertified Support Manual
- Easy deployment to all your endpoints
- Integration with MS Outlook, plus mobile applications
- Opportunity to generate new revenue streams
